## MEMORANDUM

July 14, 1994

TO: Arthur Pinchev  
Helen E. Zukin

FROM: Joel I. Cehn, (510) 268-1571, or 914-6262

RE: **Rockwell Sampling of Institute Property - Second Round**

REF: my memo of February 10<sup>th</sup>, 1994

This is to bring you up to date on the latest round of radiological sampling at the Institute, which was conducted back in March. At this point, all the laboratory analyses of soil and surface water samples are done. Rockwell, EPA and I are going over all the data now. We are getting together on July 28<sup>th</sup> (at Rockwell) to discuss it. Those expected to attend the meeting are: Gregg Dempsey, EPA, and his consultant; Donna Sutherland, from the State; Rockwell's consultants from ChemRisk; and myself. The principal scientist from Rockwell will be Neil Mukherjee--our prior point of contact, Arlene Giliberto, is no longer involved.

A follow-up meeting is planned for August 5<sup>th</sup>, at EPA's regional office in San Francisco. You are invited to attend both of these meetings. However, if you're unable to attend, I'll prepare and send you summaries of what was discussed. These summaries will include any significant findings or conclusions, drawn from the sampling data.
